Key Observations

- Paid Social drives the most SMB volume (191 leads, 16% flagged). Facebook is the primary sub-channel and generates significant personal-email traffic, though SMB personal emails are acceptable.

- 34 SMB leads have been contacted 10+ times. These represent wasted AE time and should be disqualified or archived under a formal SLA.
- 19 SMB leads originate from non-core countries. Adding country filters to SMB paid campaigns could reduce noise significantly.

Mid-Market ? 40 leads, 29 flagged (72%)

- 26 Mid-Market leads registered with personal email addresses, indicating low intent or incorrect segmentation. Adding an email-domain validation gate is recommended.
- 7 Mid-Market leads are from non-core countries. Marketing campaigns should be geo-targeted more precisely at this tier.
- Florencia Torres carries 11 flagged Mid-Market leads out of 12 assigned (avg 9.6 contacts, 11 avg days stagnant). A pipeline review session is recommended.

Individual Lead Commentary (Concerning Leads)

- Contact 206691480620 (Aris Iskandaryan): contacted 18 times with no progression; unit count (900) >500 ? suspect data.
- Contact 209005474204 (Aris Iskandaryan): registered with personal email (low intent signal for Enterprise); non-core country (Turkey).
- Contact 209111934825 (Aris Iskandaryan): registered with personal email (low intent signal for Enterprise); non-core country (Brazil).
- Contact 209124472430 (Aris Iskandaryan): registered with personal email (low intent signal for Enterprise); non-core country (Croatia).
- Contact 209464352588 (Aris Iskandaryan): registered with personal email (low intent signal for Enterprise); non-core country (Slovakia).
- Contact 211280692010 (Aris Iskandaryan): unit count (56428) >500 ? suspect data; non-core country (Philippines).

Recommendations

1. Implement a disqualification SLA: 46 leads have been contacted 10+ times with no response. Define a maximum contact threshold (e.g., 8 attempts over 30 days) after which a lead is automatically disqualified. This will free AE capacity and keep the pipeline accurate.
2. Paid Social generates 217 MQLs (21% flagged). Review Facebook campaign targeting and MQL scoring thresholds ? particularly for leads from non-core geos and personal emails. Consider requiring phone number or business email as a qualifying field.
3. Non-core country leads represent 31 flags (35% of all flags). Add country-level exclusions or scoring penalties in HubSpot for traffic originating outside core regions (Spain, Germany, Italy, Czech Republic, UK, Austria, UAE, Saudi Arabia).
4. 35 Mid-Market/Enterprise leads registered with personal email addresses. Add an email domain validation gate to the MQL scoring workflow ? personal domains should trigger a lower score or a manual review step before an AE is assigned.
5. Schedule a disqualification review session with Florencia Torres, who has the highest flagged lead count in Mid-Market/Enterprise (11 flagged). Walk through each flagged lead and formally close or recycle them. This will improve pipeline hygiene and reporting accuracy.
6. 2 leads report more than 500 rooms/properties. These are likely data errors, spam submissions, or incorrectly imported records. Add a server-side validation or HubSpot workflow to flag >500 unit submissions for manual review before MQL assignment.
