Internal report - Marketing use only

1. Executive Summary

- * Overall conversion rate is 16.9% (52 of 307 MQLs reached SQL/Opportunity/Customer).
- * Paid Social dominates volume (193 leads, 63% of all MQLs) but converts at only 8.3% - the channel generating the most noise.
- * "Just looking for info" is the #1 nurturing reason (29 leads, 33% of nurturing) - indicating leads entering the funnel before they are decision-ready.
- * Language barrier accounts for 11 nurturing leads (12% of nurturing) - suggesting geographic targeting or AE routing issues.
- * Offline Sources achieves the highest conversion rate at 75.0%, making it the highest-quality channel by outcome.
- * Spain and Italy together represent 38 of 52 conversions - the core pipeline markets.
- * 27 leads (8.8%) were disqualified (Not ICP / Lost) - reviewing targeting criteria for top disqualification sources could improve funnel efficiency.

Key Observations

- * "Just looking for info" (29 leads) is the dominant nurturing reason, suggesting many leads enter the funnel at an awareness stage - not yet ready to evaluate. Consider adding intent-qualification questions to landing page forms.
- * "No answer" (11 leads) and "Timing" (10 leads) indicate leads that engaged but were not sales-ready. These are prime candidates for automated re-engagement sequences.
- * "Language barrier" (11 leads) points to a routing problem - leads are likely coming from countries/languages not covered by assigned AEs. Review territory-to-AE mapping.
- * "Not ICP" within nurturing (2 leads) and the separate Disqualified bucket suggest targeting is too broad - particularly for

Paid Social where volume is high but quality is low.

9. Recommendations for Marketing

* Qualify intent before MQL assignment

"Just looking for info" is the #1 nurturing reason. Add qualifying questions to landing page forms (e.g., "Are you currently evaluating solutions?", "How many properties do you manage?") to filter awareness-stage visitors before they enter the MQL queue.

* Reduce Paid Social volume - increase quality

Paid Social generates 193 leads (63% of total) but only 8.3% convert. Add property count and business-type filters to ad targeting. Consider requiring a minimum unit count in lead forms to exclude homeowners and non-PMC operators.

* Implement AE-to-language routing

Language barrier caused 11 nurturing cases. Map HubSpot country fields to AE language profiles and auto-assign leads to AEs who speak the lead's language. Prioritize non-Spanish/Italian markets.

* Build a "Timing" re-engagement track

"Timing" (10 leads) and "No answer" (11 leads) represent 21 leads who showed intent but were not ready. Enroll these in a 60/90-day automated email sequence to re-qualify them.

* Investigate "No answer" leads by source

High "No answer" counts may indicate lead quality or contact-info accuracy issues at the source level. Compare phone/email validity rates across channels and add email verification to Paid Social landing pages.

* Flag and review "Europe" country entries

1 lead has "Europe" as country - this is a data quality issue in HubSpot. Audit contacts without a proper country code and create a HubSpot workflow to require country on all new MQL contacts.

* Double down on high-converting channels

Offline Sources achieves 75.0% conversion rate. Analyze what makes these leads higher quality (form fields, page content, ad creative) and replicate those conditions for lower-performing channels.
