

SQL Quality Analysis Report

Date: 2026-03-26

Total SQLs analyzed: 307

Data source: HubSpot export - mqls-not-qualified-by-ae.csv

All leads are stagnant SQLs not yet qualified by an AE.

Executive Summary

- Of 307 stagnant MQLs, 88 (29%) carry at least one quality flag - SMB: 26/219 (12%), Mid-Market: 52/72 (72%), Enterprise: 10/16 (62%).
- Paid Social is the dominant source (193 leads, 22% flagged), driven almost entirely by Facebook campaigns; many leads show personal emails and repeated contact attempts with no conversion.
- 36 leads have been contacted 10 or more times with no funnel progression - a strong signal that they should be formally disqualified rather than re-contacted.
- 19 leads (6% of total) originate from non-core countries (e.g., Morocco, Haiti, Ukraine, Indonesia, India, Brazil, Philippines) and likely bypassed geographic scoring filters.
- The most stagnant lead (gasanpolo@gmail.com, SMB) has been in MQL stage for 11 days with 3 contact attempts - no AE action on record.
- Mid-Market AE Pablo Calderón leads the Mid-Market segment in contacts-per-lead; Florencia Torres holds the most Mid-Market MQLs with the highest average days stagnant.

Key Observations

- Paid Social (Facebook) dominates SMB inbound with 147 leads and 10% flagged - the single largest source of stagnant SMB MQLs.
- 18 SMB leads have been contacted 10+ times without progressing; these should be formally disqualified to free up AE capacity.
- 10 SMB leads come from non-core countries (Morocco, Haiti, Ukraine, Indonesia, India, Brazil, etc.) - geographic filters should prevent these from becoming MQLs.

Mid-Market Segment (72 leads, 52 flagged - 72%)

Mid-Market leads carry higher commercial value. All flagged leads are shown below.

Antonio Garcia	7	3	2.9	5
Alessandro Del Bellino	1	1	31.0	9
Rocco Del Bellino	1	1	6.0	5

Key Observations

- Pablo Calderón has a Mid-Market lead (Colombia, 38 contacts, 8 days) that appears to be a data quality issue - non-core geography and 38 contact attempts.
- 17 Mid-Market leads have 10+ contact attempts - including Giulia D's 23-contact Offline Sources lead and Florencia Torres' 19-contact Instagram lead, both with 81 units.
- 44 Mid-Market leads use personal email addresses (gmail, hotmail, icloud, aol) - a quality gate concern for leads claiming 15-81 units.
- Florencia Torres leads in both volume (72 leads) and avg days stagnant; her pipeline requires a structured disqualification review.

Enterprise Segment (16 leads, 10 flagged - 62%)

Enterprise leads are high-value. All leads are shown regardless of flag status.

Recommendations

Implement a disqualification SLA for leads contacted ≥ 10 times

36 leads across all segments have reached 10+ contact attempts with no conversion. Define an explicit disqualification trigger (e.g., 10 attempts + 30 days = auto-disqualify) to free up AE capacity and improve pipeline hygiene.

Add geographic scoring filter to block non-core country MQLs

19 leads from countries like Morocco, Haiti, Ukraine, Brazil, Indonesia, Philippines, Turkey, and India entered the MQL queue. Adding a country-based exclusion to lead scoring will prevent these from reaching AEs.

Review Paid Social (Facebook) qualification criteria

Paid Social generated 193 MQLs (43 flagged, 22%). The Facebook channel is producing a high volume of low-quality leads. Tighten form qualification questions or add a unit-count threshold for this channel.

Schedule a disqualification review session for Florencia Torres' Mid-Market pipeline

Florencia Torres holds the largest Mid-Market volume with the highest average days stagnant and several leads at 15+ contact attempts. A focused AE review session should clear aged leads and reset the pipeline.

Add email domain validation gate for Mid-Market and Enterprise MQL scoring

51 Mid-Market/Enterprise leads use personal email domains (gmail, hotmail, icloud, aol). Add an email validation step that flags or blocks personal domains for non-SMB segments before they reach AE queues.

Investigate the Philippines Enterprise lead (tofiktimer@gmail.com)

This lead claims 56,428 units and originates from a suspicious email domain - almost certainly bot or spam. Review the lead scoring system to add a unit-count ceiling flag (e.g., >5,000 units triggers manual review).
