Chekin.com is a well-structured SaaS website for hospitality automation targeting property managers across vacation rentals, hotels, and hostels. The site demonstrates strong social proof (+200K properties, +25M check-ins) and clear product breadth. However, the homepage suffers from **feature overload vs. outcome-led messaging**, the pricing page lacks friction-reducing elements, and conversion paths for mid-market buyers are underdeveloped. The overall CRO score is **62/100** — good foundations with significant optimization upside.

HERO SECTION

⚠ HEADLINE IS FUNCTIONAL, NOT ASPIRATIONAL

Current EN headline: *"Automate your check-ins"*. This is process-focused, not outcome-focused. It tells visitors *what* the product does, not *why* they should care. Buyers don't want to "automate check-ins" — they want to save time, grow revenue, and avoid compliance fines. The subheadline *"Offer the best automatic guest registration process..."* is also product-centric and uses internal language.

💡 SUGGESTED HEADLINE DIRECTION

"Run your property on autopilot." or **"Your guests check in. You do nothing."** — outcome-led, benefit-first. Reserve the how (automation, registration) for the subheadline. The current headline would work better as a feature label inside the page.

✓ CTA STRATEGY IS CORRECT

Dual CTA structure (primary "Try for free" + secondary "Contact Sales") follows best practice for SaaS with a PLG + sales-assist motion. The free trial removes friction for SMB while Contact Sales captures mid-market intent. Both CTAs repeat multiple times across the page — good.

PAGE STRUCTURE & FLOW

Section	Purpose	Assessment
Hero	Hook + CTA	Weak headline Good CTA
Logo carousel / social proof	Credibility	Strong Numbers are impressive
"For all types of accommodation"	Segment identification	Good Helps visitors self-identify
Stats section (200K, 25M, 45)	Authority	Strong Specific numbers build trust
Feature breakdown (8 features)	Product depth	Overloaded Too many features, no prioritization
Testimonials carousel	Social proof	Weak format Carousels reduce engagement
PMS integrations	Compatibility	Good Reduces switching objection
Mobile app section	Secondary product	Misplaced Dilutes primary conversion goal

X FEATURE OVERLOAD IN THE MAIN PAGE BODY

8 features are listed with equal visual weight on the homepage. This creates decision fatigue and fails to guide visitors toward what's most important. Best practice: surface 3 hero features on the homepage, link to a dedicated features page. Each feature should lead with a customer benefit, not a product label (e.g., "Never miss a tax deadline" not "Tourist Tax").

X TESTIMONIAL CAROUSEL KILLS CONVERSIONS

Auto-rotating carousels are one of the most documented CRO anti-patterns — users ignore them, they can't be read at reading speed, and they create visual noise. The current testimonials are high quality (named companies, specific use cases) but are buried in a carousel. Replace with 2–3 static testimonial cards with photos, job titles, and specific metrics.

⚠ NO PRICING ANCHOR ON HOMEPAGE

Visitors cannot discover pricing without clicking away to a separate page. For SMB buyers especially, not seeing a price is a trust barrier and can increase bounce. Consider adding a "Plans from €3.95/property/month" anchor with a "See pricing" link in a section mid-page.

3 Pricing Page Analysis

BASIC €3.95 /property/mo Check-in online · Legal compliance · iCals · Security deposits · Tourist taxes · Online payments · Upselling	PREMIUM ★ RECOMMENDED €5.95 /property/mo All Basic + 1 premium add-on (ID verification, remote access, guest app, digital guide, unified inbox, e- invoicing)	ENTERPRISE €7.95 /property/mo All Basic + All Premium features combined
---	--	--

✗ PREMIUM PLAN HAS A CONFUSING "1 ADD-ON" MODEL

The Premium plan includes "all Basic + *one* premium add-on of your choice." This creates cognitive load — the visitor now has to make a secondary decision inside an already complex pricing choice. The value of Premium vs. Enterprise becomes unclear. Consider renaming to something like "Premium+" with a fixed curated set of 3 add-ons, or restructure to feature-based tiers without per-feature selection.

✗ NO MONEY-BACK GUARANTEE OR RISK REVERSAL

There is a 14-day free trial (no credit card) which is positive. However, after trial conversion, there is no mentioned refund policy or risk reversal. For property managers committing to an annual plan (20% discount incentive), the absence of any safety net is a meaningful conversion barrier, especially for the €7.95 Enterprise tier.

⚠ ANNUAL PLAN DISCOUNT MESSAGING IS UNDERSOLD

"Save up to 20%" on annual is mentioned but not made visually prominent. The pricing industry standard is to show both monthly and annual prices side by side, with the annual price shown by default and monthly as the alternative. Show the absolute savings ("Save €23.40/property/year") not just percentages.

⚠ MINIMUM PROPERTY THRESHOLD CREATES EARLY FRICTION

Monthly plans require a minimum of 3 properties; annual plans require 20. This means solo property owners (1–2 properties) cannot access the product on a monthly basis. This threshold is not prominently communicated and could lead to high churn when users discover it post-signup. Either surface this clearly upfront or consider a single-property plan to capture the long tail.

✓ 14-DAY FREE TRIAL WITH NO CREDIT CARD REQUIRED

This is the single strongest conversion element on the pricing page. No credit card friction removes the primary objection for self-service buyers. The CTA "Try it free" is clear and repeated per plan.

✓ **COMPREHENSIVE FEATURE COMPARISON TABLE**

The detailed feature matrix across all three plans gives buyers the information they need to self-select. This reduces inbound sales qualification load and supports PLG motion.

ONLINE CHECK-IN FEATURE PAGE

✓ CLEAR 6-STEP PRODUCT FLOW

The Online Check-in page explains the product journey in 6 concrete steps from guest link receipt to payment. This is excellent — it answers the implicit visitor question "how does this actually work?" before they have to ask sales. The stat "process completes in under 1 minute" is powerful and specific.

⚠ STATS NEED MORE SPECIFICITY AND RECENCY

The page references "nearly 4 million happy guests" — this is weaker than the homepage's "25 million check-ins." The discrepancy is confusing (are these different metrics?). Ensure consistent data points across all pages, and add a timeframe ("as of Q1 2026") to make numbers feel current and verifiable.

⚠ FEATURE PAGES LACK ROI QUANTIFICATION

The homepage claims "reduce operational burden by up to 87%" but feature pages don't consistently reinforce ROI. Each feature page should include: hours saved per month, revenue uplift potential (e.g., average upsell conversion rate), and compliance cost avoided. These transform feature descriptions into business cases.

NAVIGATION & INFORMATION ARCHITECTURE

⚠ NAVIGATION IS OVERCROWDED WITH MEGA-MENUS

The main nav includes: Funcionalidades, Soluciones, Recursos, Precio, Países, Login, Language switcher. "Países" (Countries) as a top-level nav item is unusual and likely low-intent — this content belongs in a footer or under Resources. Top nav should prioritize the buyer journey: Features → Solutions → Pricing → Start Free.

✗ /EN/FEATURES RETURNS 404

The English features overview page at /en/features returns a 404 error. This is a broken page that may be receiving organic traffic from SEO and losing those visitors. Immediately redirect to the correct features URL or restore the page.

✓ STRONG TOPIC COVERAGE ACROSS BUYER SEGMENTS

The blog covers practical, problem-led content across multiple hospitality segments (apartments, hotels, villas, vacation rentals). Topics like "Hotel automation: how to start without getting lost" and "Short-Term Rental Deposit: How to Manage It Efficiently" directly address buyer pain points and support SEO with high-intent keywords.

⚠ CONTENT LACKS CONVERSION PATHWAYS

Blog posts appear to be informational without strong internal linking to product pages or contextual CTAs. Each blog post should include: (1) a relevant product CTA in the first 300 words, (2) a contextual CTA mid-article tied to the topic, (3) a bottom-of-post CTA with a specific offer. Blog traffic should have a clear path to trial signup.

⚠ MISSING BOTTOM-OF-FUNNEL CONTENT

The blog focuses on educational (TOFU) content. Missing: comparison pages ("Chekin vs. Guesty", "Chekin vs. Hostaway"), case study deep-dives with quantified results, ROI calculators, and integration-specific pages (e.g., "Chekin + Airbnb", "Chekin + Booking.com"). These high-intent pages capture buyers already evaluating competitors.

6 Trust & Social Proof Audit

Element	Present	Quality	Recommendation
Customer count (200K)	✓ Yes	Strong	Add timeframe ("as of 2026")
Check-in volume (25M)	✓ Yes	Strong	Use in hero or above fold
Named customer testimonials	✓ Yes (7 companies)	Good	Add photos + job titles
Case studies	Partial	Weak	Add quantified outcomes (€, %)
Review platform badges (G2, Capterra)	✗ Not visible	Missing	Add immediately if rated
GDPR / Security badges	✓ Yes	Good	Move higher on pricing page
Press / Media mentions	✗ Not visible	Missing	Add if coverage exists
Integration logos (35+ PMS)	✓ Yes	Strong	Show top 5 logos visually

7 CRO Recommendations — Priority Matrix

PRIORITY	RECOMMENDATION	PAGE	ESTIMATED IMPACT	EFFORT
HIGH	Rewrite hero headline to be outcome-led, not feature-led	Homepage	+8–15% CVR	Low
HIGH	Fix /en/features 404 — redirect or restore page	Features	Recovers organic traffic	Very Low
HIGH	Replace testimonial carousel with 3 static cards (photo + metric)	Homepage	+5–10% engagement	Low
HIGH	Simplify Premium plan — remove "1 add-on" model, use fixed feature set	Pricing	+10–20% plan upgrade rate	Medium
MEDIUM	Show pricing anchor on homepage ("from €3.95/mo") to reduce bounce	Homepage	+5% scroll depth	Very Low
MEDIUM	Add annual plan default toggle with absolute savings displayed (€ amount)	Pricing	+15% annual plan selection	Low
MEDIUM	Add G2 / Capterra rating badges to homepage and pricing page	Both	+3–7% trust CVR	Very Low
MEDIUM	Add contextual CTAs to all blog posts (product-linked)	Blog	+20–40% blog→trial conversion	Medium
MEDIUM	Create 3 competitor comparison pages (vs. Guesty, Hostaway, Lodgify)	New pages	SEO + BOFU capture	Medium
LOW	Remove "Países" from top nav; move to footer or Resources	Global	Cleaner navigation	Very Low
LOW	Add quantified ROI stats to each feature page (hours saved, €/month)	Features	+8% demo request rate	Medium
LOW	Surface minimum property threshold (3 monthly / 20 annual) on pricing	Pricing	Reduces churn, improves IQ	Very Low

 WEEK 1 — ZERO-CODE CHANGES

1. **Fix /en/features 404** — add a redirect in 10 minutes.
2. **Add G2/Capterra badges** to homepage and pricing page — paste widget code.
3. **Remove "Países" from main nav** — move to footer.
4. **Show pricing anchor on homepage** — add one sentence "Plans from €3.95/property/month → See pricing".
5. **Surface minimum property requirement** on pricing page in FAQ or plan description.

 WEEK 2 — COPY & DESIGN CHANGES

1. **Rewrite hero headline** — A/B test "Your guests check in. You do nothing." vs current.
2. **Replace testimonial carousel** with 3 static cards (SmartRental, Greystar, Hostmacher) including company size, metric, and headshot.
3. **Update pricing page** to show annual pricing by default with toggle to monthly. Show "Save €X/year" in absolute terms.
4. **Add blog CTAs** — add 1 contextual CTA box to the 5 most-trafficked blog posts.
